CATERING

Get in 3 hours before show starts. Fresh fruits, coffee & tea are appreciated

Warm vegetarian food 1,5 hour before the concert starts

1 heated room with mirror, lockable and exclusively for the band 1 hour before the show and 1 hour after the show.

LIGHT

In general we prefer the following basic light scenes:

1. Announcement - back light and soft warm white front light
2. Beginning of song - light from back - slowly fade in front light
3. During song - as you like
4. End of song - fade out front light - back light stays until end of applause. When we start with the next announcement, then fade in front light. If we don't make an announcement just wait until the next song starts. But please do not flash front light when there's nobody talking from stage or no audible sound. Sometimes we just need a few more seconds. It's okay, when stage stays dark or only with back light.
